

Arinao Ndou

Junior Software Engineer (Full Stack)

tylerking406@gmail.com | 079 440 5311 | LinkedIn: Arinao Ndou | github.com/Tylerking406 | Cape Town, South Africa

PROFILE

Highly motivated full-stack software engineer with a strong backend foundation in C# .NET Core and a proven record of delivering production-ready, scalable solutions. Passionate about clean architecture, microservices, and continuous improvement within agile teams.

PROFESSIONAL EXPERIENCE

Junior Software Engineer (Full Stack)

Digital Outsource Services (Pty) Ltd — Cape Town | March 2026 – Present | Permanent, Full-time

- Promoted to permanent Junior Software Engineer (Full Stack) following a successful graduate period.
- Develop and maintain backend services in C# (.NET Core) following MVC and microservices architecture.
- Completed a critical 8-point payment run ticket within days, designing optimized stored procedures and transactional logic in Microsoft SQL Server.
- Migrated all Syncfusion data grids to DevExpress components using Vue.js, improving maintainability and performance company-wide.
- Containerize applications with Docker; deploy and manage images within Kubernetes clusters for scalable production readiness.
- Contribute to CI/CD pipeline integration, streamlining deployment workflows and reducing manual intervention.
- Proactively support the Product Owner across multiple modules, demonstrating cross-functional ownership beyond assigned scope.
- Participate in Agile (Scrum) sprint ceremonies and collaborate with cross-functional teams to deliver features on schedule.

Software Engineer Graduate (Backend-Focused Full Stack)

DigiOutsource — Cape Town | 2025 – February 2026

- Initiated backend development using C# .NET Core in a microservices environment.
- Assisted the Product Owner across various modules, demonstrating ownership beyond assigned tasks.
- Migrated Syncfusion data grids to DevExpress and contributed to Docker/Kubernetes deployment workflows.

Murex Analyst

Kion Consulting | 2024

- Gained expertise in financial technology and capital markets operations.
- Received training in MXML, XML, XSLT, SQL, Unix, and Bash scripting.
- Automated operational tasks to improve efficiency across financial workflows.

Full-Stack Developer Intern

Tata-iMali | 2024

- Streamlined backend operations and optimized code for improved performance.
- Designed and developed reusable frontend components using React, improving development efficiency.
- Integrated pages with React Navigation and enhanced UI responsiveness.
- Leveraged Firebase for backend services including real-time database and user authentication.

Tutor

University of Cape Town & Private Companies (MAVA, Tutor Doctor) | 2023 – 2024

- Provided academic support for algorithms, software engineering, and business systems analysis.
- Assisted over 50 students, improving average grades by 20%.

EDUCATION

Bachelor of Science in Computer Science and Computer Engineering

University of Cape Town | Graduated November 2024

Key Modules: Artificial Intelligence, Machine Learning, Dynamic Programming, Theory of Computation, Parallel Computing, Internet of Things.

TECHNICAL SKILLS

Programming Languages: Java (3+ years), Python, C/C++, C# (.NET Core), Assembly (STM32)

Frameworks & Libraries: React.js, React Native, Vue.js, Node.js, .NET Core, LangChain, FastAPI, Material-UI

Databases: Microsoft SQL Server, MySQL, Firebase

DevOps & Tools: Docker, Kubernetes, CI/CD Pipelines, Git, Azure DevOps, DevExpress, Syncfusion

Concepts: Microservices Architecture, MVC, REST APIs, Agile/Scrum, Data Structures & Algorithms, Backend Optimisation, Responsive UI Design, Code Refactoring

PROJECTS

Tutoring Application (In Development)

- AI-driven tutoring mobile app integrating Falcon AI with LangChain for intelligent response generation.
- Backend built with FastAPI; frontend developed in React Native for cross-device compatibility.
- Hosted on cloud platforms for scalability.

Guest Booking Application (Publicly Available)

- React web app featuring randomized quotes, voice notes synchronized with images, and a photo/video gallery.
- Guest booking system with user-submitted messages stored in Firebase with real-time notifications.

Basketball Outcome Prediction

- Algorithm predicting basketball shot outcomes using sensor data.

Digit Recognition using CNNs

- Convolutional Neural Network model achieving 98.7% accuracy in classifying handwritten digits.

ACHIEVEMENTS

- Promoted to permanent Junior Software Engineer (Full Stack) at Digital Outsource Services, February 2026.
- Achieved distinction (77%) in CSC3002F (Software Engineering) at the University of Cape Town.
- Built scalable financial systems during a Web3 fintech internship.
- Successfully led multiple project tasks in both academic and professional settings.
